15 Subject: EFS error and request thereof

Technology Center 2600

Dear Sir or Madam:

20 An error has arisen in the course of electronically filing a nonprovisional patent application. The error arose due to confusion with the user interface of the USPTO's Electronic Filing System (EFS). This error resulted in two filings for the same application, with a consequent issuance of two filing receipts, and deduction from a deposit account the filing and assignment fees for two applications. A request that the
25 first, unintentional filing be stricken from the record, and that a corresponding credit to the deposit account for the fees thereof, is requested. The facts of the case are outlined below.

30 On 06/26/2002, an electronic filing procedure was initiated to file a nonprovisional patent application, attorney docket number VIAP0038USA. In the course of the filing, a screen similar to the one presented on page "1" (page numbers are indicated with red encircled numerals) was generated. Unfortunately, an error was detected while data

was being uploaded to the USPTO. Specifically, it was noted that the title had been garbled, the first word "Method" reading "Methmethod". Consequently, the "Cancel" button (indicated by red arrow on page "1") was pressed, in the belief that this would cancel the filing procedure. This belief was erroneous. This was not, however, known
5 at the time. A bit later and on the same day, with the title corrected, a new EFS filing procedure was performed and completed for the case.

Page "2" is a printout of information obtained from the USPTO regarding the so-called "Acknowledgement Receipt". It was our belief, based upon this information,
10 that if an Acknowledgment Receipt acknowledged the successful upload of data, then lack of such a receipt would indicate that no successful upload of data had occurred, and hence no EFS procedure had been completed. When the "Cancel" button of page "1" had been pressed, the EFS procedure appeared to have been canceled, and no Acknowledgment Receipt was received. It was assumed, then, that no EFS procedure
15 had, in fact occurred. A subsequent EFS procedure, fully completed, resulted in the corresponding Acknowledgment Receipt of page "3". The upshot of this is that it was assumed, based upon the received data and the assumption that the "Cancel" button really does cancel the EFS procedure, that only one filing procedure had occurred.

20 However, on 07/29/2002, much to our surprise, we obtained *two filing receipts* for the same nonprovisional application. The first filing receipt, page "4" and bearing the application number 10/064,258, must have arisen as a result of the allegedly canceled first EFS procedure, as it contains the garbled title (with a portion thereof encircled in red). The second filing receipt, page "5" and having application number 10/064,259,
25 must be in response to the second, fully completed EFS procedure, as it contains the corrected title.

Some time later the deposit account used for the above filing(s) was checked, deposit account number 500801. The output of this is shown on pages "6a", "6b" and "6c". In
30 particular, though, attention is drawn to the highlighted portions of page "6c". Arrow "a" indicates the deduction of filing fees for the unintentional and unwanted first filing procedure, the procedure that was thought to have been canceled. Arrow "b" indicates

the deduction of assignment fees for the unintentional and unwanted first filing procedure. The total fees for misinterpreting the meaning of the "Cancel" button on page "1" thus amounts to \$780.00. If it had been known that the first filing process was not actually canceled (i.e., that application 10/064,258 actually existed and would
5 be charged for), correction to the title could have been done for free by way of amendment.

To my knowledge, there are currently no procedures in place within the MPEP to account for this problem, as the problem is unique to the EFS. I do not feel that a
10 proper analogy can be drawn from standard mailing procedures. The relatively instantaneous feedback of the EFS tends to imply the occurrence of actions that the slower mailing procedure simply cannot. For example, one can only be certain that a case was received and filed by the USPTO in a normal mailing procedure upon receiving the Filing Receipt, which occurs weeks later, and which can be lost in the
15 mail. However, with the EFS, one is instantly assured that a case was filed by reception of the Acknowledgment Receipt, and there is no reason to believe that such an Acknowledgment Receipt could be "lost" in the electronic exchange. The simple act of *not* getting the Acknowledgment Receipt seems therefore to imply that a case has *not* been filed, and implies this in a manner that is much stronger than not
20 receiving a Filing Receipt would in a typical mailing procedure. However, if an analogy must be drawn, then pressing the "Cancel" button of page "1" should essentially be like removing correspondence from a postal service outbox, preventing the correspondence from reaching the USPTO in the first place.

25 In short, it is requested that the first, inadvertent filing, application number 10/064,258, as shown on page "4", be canceled. This is not a request for express abandonment, but is instead a request that the case be considered as never filed in the first place. Something that has not been filed cannot be abandoned, and should therefore have no associated service fees. The second, correct filing, application number 10/064,259, as
30 shown on page "5" is to be kept. Further, it is requested that the filing fee of \$740.00, and the assignment fee of \$40.00, associated with the inadvertent filing, be credited back to the deposit account for NAIPO, account number 500801.

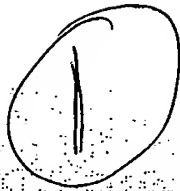

Finally, we would respectfully suggest that future versions of the EFS contain some sort of verification procedure to avoid the above-indicated problem. For example, if the "Cancel" button is pressed, the EFS should indicate that the entire procedure has been canceled and that no filing will thus result, or otherwise indicate that an application has nonetheless been filed, and fees thereof will be deducted from the deposit account. Alternatively, the USPTO may consider a final "Are you *absolutely* certain?" step that must be confirmed prior to final acceptance of uploaded information.

My regards,

USPTO Electronic Filing System

Filer, Forms, Attachments, Validate, Comments, and Submit Tabs, the Print menu item in File will print the application transmittal form.

When application data sheet, fee transmittal, Biosequence transmittal, and patent assignment recordation forms are being created those forms will print when Print is selected from the File menu.

After validation a complete list of any validation errors and a description of those errors may be printed by clicking on the **Print Errors** button.

The application data sheet, fee transmittal, Biosequence transmittal, and patent assignment recordation forms may be printed by highlighting the form in the Attachments tab and selecting the View button. From the viewer, the displayed form may be printed.

Acknowledgement Receipt

After the package has been transmitted to the USPTO server will date and timestamp the package, verify that the contents of the package have not been altered using digital signature technology, and return a unique EFS Transaction ID, the date and time received at USPTO, and other pertinent information to ePAVE to make-up the Acknowledgement Receipt.

Please refer to the EFS Legal Framework at the Patents Electronic Business Center web site for force and effect of the Acknowledgement Receipt. The Acknowledgement Receipt establishes the date of filing for New Utility Patent Application or the date of receipt for subsequent filing. The Acknowledgement Receipt does not grant an official filing date for the new utility Patent application.

If the print version of the New Utility Patent Application filed using EFS is unreadable the applicant will be promptly notified by phone, fax or e-mail depending on the correspondence and application information provided by the applicant to USPTO. If subsequent filings are unreadable or usable the applicant or practitioner will be sent notification as is current practice.
